MOUDEVPRO.COM

Google Ads Audit

Issues found and how to fix each one

Account 528-046-9672 · Analysis window 29 Sep – 28 Oct 2026 · Prepared 29 Oct 2026

Executive summary

5 131	423	66	78 MAD	12.1 MAD
Spend (MAD)	Clicks	Conversions	Cost / conversion	Avg. CPC

The account is not losing to competitors — it leads both website auctions with about 64% impression share, and no rival goes above 16%. The problems are internal: **Google is optimising on WhatsApp clicks instead of real leads**, **half the Casablanca budget sits on one weak keyword**, desktop is switched off, and negative keywords are inconsistent — some even block your own buyers. All of these are fixable in a few hours, at no extra cost.

#	Issue	Severity	Fix time
1	Conversion tracking only counts WhatsApp/phone clicks; form and qualified-lead actions were removed	Critical	30 min
2	One generic keyword takes 50% of Casablanca spend at 118 MAD/conversion; 92% of spend is close variants	Critical	10 min
3	Desktop and tablet excluded (-100%) on both website campaigns	Critical	5 min
4	Negative keywords inconsistent; ~1 600 MAD on DIY/builder searches	High	20 min
5	13 existing negatives block buyers (wordpress, laravel, web marrakech…)	High	15 min
6	Ad copy says “agence” / “nous” and has no price or delivery time	High	30 min
7	Location targeting = “presence or interest”	Medium	5 min
8	Casablanca target CPA (90) below real CPA (99) → 36% of auctions lost on rank	Medium	5 min
9	google-ads-casa: navigational “google ads” searches + daily manual pause/resume	Medium	15 min
10	Auto-applied recommendations and auto-created assets still on	Medium	5 min
11	Wrong sitelink (/rabat#ecommerce on Casablanca); /tarifs 0 conversions	Low	15 min
12	Marrakech paused despite the best historical CPA; Rabat can scale	Opportunity	15 min

1. Account performance

Last 30 days by campaign

Campaign	Spend	Clicks	Conv.	CPA	CPC	CTR	Impr. share	Lost (rank)
Creation-site-web (Casablanca)	3 973	291	40	**99**	13.65	11.0%	64%	36%
creation-site-web-rabat	972	99	20	**49**	9.82	13.4%	65%	35%
google-ads-casa	186	33	6	**31**	5.65	5.8%	32%	68%
creation-website-marrakech	paused							
creation site web (PMax)	paused							
Total	**5 131**	**423**	**66**	**78**	**12.13**	**10.7%**		

Amounts in MAD. Impression share lost to budget is 0% on every campaign: budgets are not the limit (Casablanca spends ~130 MAD/day of a 400 MAD/day budget).

Monthly trend — cost per conversion (MAD)

Campaign	May	Jun	Jul	Aug	Sep	Oct*
Casablanca	47	53	63	**130**	96	97
Casablanca — avg. CPC	8.5	11.2	12.4	**21.6**	14.9	13.6
Rabat	54	50	48	44	44	48
Marrakech	57	36	37	paused	paused	paused

*October = 1–28 Oct. Casablanca's cost per conversion doubled in August and has not recovered; Rabat is flat; Marrakech was the cheapest city before it was paused.

Where the money goes

Breakdown	Value	Comment
Search terms matched exactly	294 MAD (8%)	The rest is Google's close variants
"Near exact" + "near phrase" variants	3 399 MAD (92%)	Includes the bare query "site web" (344 MAD)
DIY / builder searches (215 terms)	1 592 MAD	carrd, site123, "comment créer…", website builder…
Search terms with 0 conversions	2 215 MAD (144 terms)	Long tail — not all of it is waste
Mobile share of spend (website campaigns)	100%	Desktop and tablet excluded

2. Issues and solutions

Ordered by severity. Each issue shows the evidence from your account, why it costs you money, and the exact fix.

CRITICAL

Issue 1 — Google is learning from WhatsApp clicks, not real leads

WHAT I FOUND

- Only one conversion action is active: **Contact-from-moudev** (WhatsApp + phone clicks), fixed value 100 MAD.
- **Submit lead form**, **Contact** and **Lead Qualifié (OCI)** have status **REMOVED**.
- DIY searches (“comment créer un site web”, “site123”, “carrd com”, “build your store”) cost 1 592 MAD for 22 conversions — a cost per conversion of 72, the same as real buyer searches. People wanting a free builder cannot convert like buyers: the signal is noisy.

WHY IT MATTERS

All campaigns use Maximize Conversions. The algorithm spends your budget chasing whatever it counts as a conversion. If a WhatsApp click from a curious student counts the same as a client asking for a quote, Google will keep buying both. Form leads (often desktop) are invisible, so desktop looks useless (see issue 3).

SOLUTION

1. Compare the 66 conversions reported for October with real leads in the “OCT moudev” sheet (WhatsApp conversations + forms). This tells you how inflated the number is.
2. Re-create the **Submit lead form** conversion (the site code already fires it) and set it as **Primary**.
3. Re-create **Lead Qualifié (OCI)** and resume the weekly upload of qualified leads.
4. Set **Contact-from-moudev** to **Secondary**, or keep it primary but lower its value (e.g. 30 MAD) while form = 200 MAD and qualified lead = 500 MAD.
5. Wait 2 weeks of clean data before judging bids or CPA targets.

EXPECTED IMPACT

Bidding optimises toward people who actually ask for a quote. Typically the reported conversion count drops, but the cost per *real* lead falls.

CRITICAL

Issue 2 — Half the Casablanca budget is on one weak keyword

WHAT I FOUND

Keyword	Campaign	Spend	Conv.	Cost/conv.	QS
“creation site internet” (phrase)	Casablanca	**2 003**	17	**118**	5
[creation de site web] (exact)	Casablanca	681	13	52	**8**
“creation site internet” (phrase)	Rabat	641	14	46	5
“creation site e-commerce” (phrase)	Casablanca	345	2	173	8

Only 8% of spend matched a keyword exactly. The bare query “site web” got 28 clicks for 344 MAD.

WHY IT MATTERS

One generic keyword with a below-average expected CTR absorbs 50% of the Casablanca spend at more than twice the cost per conversion of the exact keyword next to it. Quality Score 5 also raises the price of every click.

SOLUTION

1. Change “creation site internet” in Casablanca from phrase to **exact** match (or cap its bid).
2. Add exact keywords that already convert cheaply: [creation de site web], [creation site web casablanca], [développeur web casablanca], [site web casablanca].
3. Move “creation site e-commerce” to its own ad group landing on /ecommerce with e-commerce ad copy.
4. Review the search-terms report weekly and promote converting queries to exact keywords.

EXPECTED IMPACT

Cost per conversion on half the Casablanca budget from ~118 toward ~60 MAD; higher Quality Score lowers CPC.

CRITICAL

Issue 3 — Desktop and tablet are switched off

WHAT I FOUND

Device bid adjustment is **-100%** on desktop and tablet for both Creation-site-web and creation-site-web-rabat. 100% of their spend is mobile. On google-ads-casa (which runs on desktop) desktop produced 1 conversion from 9 clicks.

WHY IT MATTERS

People choosing a web developer often compare options on a computer. Because the form conversion was removed (issue 1), desktop leads were never counted, so desktop looked bad — and was then switched off. The data that would prove it wrong can no longer be collected.

SOLUTION

1. First fix issue 1 (form conversion back).
2. Then set desktop to **-40%** (not -100%) on both website campaigns for 3–4 weeks.
3. Keep tablet excluded (low volume).
4. Compare cost per *real* lead by device after 4 weeks and adjust.

EXPECTED IMPACT

Access to the desktop audience you currently never reach, measured fairly.

HIGH

Issue 4 — Negative keywords are inconsistent between campaigns

WHAT I FOUND

- 340 campaign-level negatives, **0 shared lists**. Each campaign has a different list.
- Rabat lacks “comment” (Casablanca has it): “comment créer un site web” cost 95 MAD there.
- Builders still get through: carrd, site123, mixo, webild, tiiny, brizy, blogspot, teleporthq, devaito, figma, prestashop, “website builder”, “build your store”, “google site”.
- Auction insights confirm it: Shopify, Hostinger, Strikingly, Fiverr and google.com appear in your auctions.

WHY IT MATTERS

DIY searchers will never hire a developer. ~1 600 MAD in 30 days went to such queries.

SOLUTION

1. Create the shared list **MDP — Universel** (jobs, training, free, marketplaces) and attach it to all 4 campaigns.
2. Create **MDP — Site web DIY** (builders, DIY intent, competitors) and attach it to the 3 website campaigns.
3. Full paste-ready lists: Appendix A and file ads/shared-negative-lists-2026-10-29.md.

EXPECTED IMPACT

Roughly 600–900 MAD/month of wasted spend redirected to buyer searches.

HIGH

Issue 5 — 13 existing negatives block your own buyers

WHAT I FOUND

Negative (match)	Where	Blocks e.g.
“wordpress”	Casa, Marrakech	développeur wordpress casablanca
“woocommerce” + broad, [woocommerce maroc]	Casa (+all)	développeur woocommerce maroc
“custom”, “responsive”	Casablanca	site web responsive casablanca
“laravel”, “next js”	Casablanca	développeur laravel casablanca
“plateforme”	Casablanca	création plateforme web maroc
“gestion site web”	all website	maintenance clients
[site e commerce]	all website	your e-commerce offer
[startup développement web]	Rabat, Marrakech	Rabat startup persona
[web marrakech]	all website	a Marrakech buyer — fatal on Marrakech
[webmaster casablanca]	Casablanca	someone looking to hire
figma" (broad, malformed)	Casablanca	broken entry

WHY IT MATTERS

You sell WordPress, WooCommerce and custom builds. These negatives stop your ads from showing on searches for exactly those services.

SOLUTION

1. Remove these 13 negatives from each campaign.
2. If DIY WordPress traffic comes back, block it precisely: “wordpress gratuit”, “installer wordpress”, “wordpress com”, “woocommerce theme”, “woocommerce plugin”.

EXPECTED IMPACT

Ads show again on high-intent technical searches (WordPress/WooCommerce/Laravel developers).

HIGH

Issue 6 — Ad copy works against your positioning

WHAT I FOUND

- Casablanca headline: **“Agence Web à Casablanca”** — you are a freelancer.
- Rabat: “Contacte**z-nous**”, “Appele**z-nous**”, “**agence** de création de site web”.
- No price, no delivery time, no “développeur freelance” in either website ad.
- “Site Web Au Meilleur Tarif” is an unverifiable superlative.
- Expected CTR is **below average** on the main keyword.

WHY IT MATTERS

Your advantage over agencies (billiontech, majormedia, creaweb…) is direct contact, speed and visible price. The ads hide all three and sound like the agencies they compete with — so they don’t stand out, CTR stays low, and Quality Score stays at 5.

SOLUTION

Rewrite both RSAs following your google-ads-casa ad (which already works: “Dès 1 000 DH/Mois”, “Vous parlez directement au consultant”). Suggested headlines:

```
Création Site Web Casablanca          Développeur Web Freelance
Site Vitrine dès X DH                 Livré en 7 à 10 Jours
Devis Gratuit en 24h                  Vous Parlez au Développeur
Pas d’Agence, Pas d’Intermédiaire     Qualité Agence, Prix Freelance
React, WordPress, WooCommerce         Paiement Après Livraison
Site E-commerce Clé en Main           Création Site Web à Rabat
```

Descriptions in first person singular (“je crée”, “contactez-moi”). Remove “agence”, “nous”, “meilleur”.

EXPECTED IMPACT

Higher CTR → better Quality Score → lower CPC, and a message that differentiates you on the results page.

MEDIUM

Issue 7 — Location targeting includes people outside your cities

WHAT I FOUND

All campaigns use **“Presence or interest”**.

WHY IT MATTERS

Your ads can show to people who are not in Casablanca/Rabat but search about those cities (including abroad).

SOLUTION

1. Campaign settings → Locations → Location options → **“Presence: people in or regularly in your included locations”** — on every campaign.

EXPECTED IMPACT

Less irrelevant traffic; cleaner city-level data.

MEDIUM

Issue 8 — Casablanca loses 36% of auctions on rank — because of its own settings

WHAT I FOUND

- Target CPA set on 21 Oct: Casablanca **90 MAD** (actual 99), Rabat 60 MAD (actual 49).
- Auction insights: you already have 64% impression share; no competitor exceeds 16%, and you outrank each one ~60–64% of the time.

WHY IT MATTERS

A target below what the campaign achieves forces Google to bid lower, so you lose auctions on rank. Competitors are not what pushes you out — your Quality Score (5) and this target are.

SOLUTION

1. Do **not** raise bids to fight competitors.
2. Fix issues 2 and 6 first (keyword mix + ad copy → higher QS).
3. If volume is still limited after 2 weeks, raise the Casablanca target to ~110 MAD, then lower it gradually.

EXPECTED IMPACT

Recover part of the 36% lost impression share without paying more per click.

MEDIUM Issue 9 — google-ads-casa: unwinnable navigational searches + manual pausing

WHAT I FOUND	• google.com has 27% impression share, overlaps 34% of your auctions and is above you 99% of the time (Google advertising its own product on “google ads”). • Search terms “google ads” and “ads google” are being paid for. • The campaign is paused/resumed by hand from the mobile app ~00:30 and ~08:30 every day (12 times since 19 Oct). • Bidding = Maximize Clicks, 60 MAD/day budget, ~16 MAD/day spent. Cost/conv. 31 MAD — good.
WHY IT MATTERS	People typing “google ads” want the Google Ads login, not a consultant. Daily manual pausing restarts the campaign’s learning every day.
SOLUTION	1. Add exact negatives [google ads], [ads google], [google ad], [google adwords] + the list in Appendix A. 2. Replace manual pausing with an **ad schedule** 07:00–24:00, as done on the website campaigns on 6 Oct. 3. After ~15 conversions, switch to Maximize Conversions. 4. Keep the keyword “marketing digital casablanca” — 5 conversions for 97 MAD.
EXPECTED IMPACT	Budget focused on real prospects; stable learning.

MEDIUM Issue 10 — Google still changes the account on its own

WHAT I FOUND	26 assets were created by Google’s internal tool in the last 30 days; in August, an auto-applied recommendation set a target CPA.
WHY IT MATTERS	Automatic changes make it impossible to know which of your fixes worked.
SOLUTION	1. Recommendations → **Auto-apply** → turn off all types. 2. Account settings → turn off automatically created assets if you want full control of ad text.
EXPECTED IMPACT	A clean before/after measurement for every fix in this report.

LOW Issue 11 — Landing-page details

WHAT I FOUND	• Casablanca campaign sent 9 clicks (111 MAD) to **/rabat#ecommerce** — probably a sitelink. • **/tarifs**: 12 paid clicks, 178 MAD, 0 conversions (keywords “prix/devis site web casablanca”). • “développeur web casablanca” and “création site web maroc” have **below-average landing page** score on /casablanca.
WHY IT MATTERS	A Casablanca searcher landing on the Rabat page loses trust; a pricing page without a clear mobile CTA loses leads.
SOLUTION	1. Point that sitelink to /ecommerce or /casablanca#ecommerce. 2. On /tarifs, add a WhatsApp CTA above the fold on mobile and “Devis gratuit — réponse en 24h”. 3. On /casablanca, use “développeur web” and “création site web Maroc” in the H1/intro (first 100 words).
EXPECTED IMPACT	Fewer lost clicks, better landing-page component of Quality Score.

OPPORTUNITY

Issue 12 — Marrakech and Rabat are your cheapest growth

WHAT I FOUND	• Marrakech: 57 → 36 → 37 MAD per conversion in May–July, then paused. Its ad lands on the homepage (/). • Rabat: stable 44–49 MAD per conversion for 6 months, 65% impression share, budget not limiting.
WHY IT MATTERS	Cheaper cities produce more leads for the same money than pushing Casablanca harder.
SOLUTION	1. Reactivate Marrakech at ~100 MAD/day, landing on **/marrakech** (hotels, riads, restaurants, English section). 2. Fund it from the budget saved on “creation site internet” (issue 2). 3. Raise Rabat’s target CPA slightly (60 → 65) to win more of the 35% lost on rank.
EXPECTED IMPACT	More conversions at a lower blended cost per conversion.

3. Competitive landscape (Auction insights)

Key takeaway: you lead both website auctions. The market is fragmented — the biggest rival has 16% impression share. Winning more traffic is a Quality Score problem, not a bidding war.

Casablanca — your impression share 64%, absolute top 57%

Competitor	Impr. share	Overlap	Above you	Abs. top	You outrank
creaweb.ma	16%	21%	30%	18%	60%
dotma.ma	14%	16%	43%	24%	60%
majormedia.marketing	<10%	9%	**62%**	**48%**	61%
billiontech.ma	<10%	5%	**69%**	40%	62%
mediazain.com	<10%	11%	8%	4%	64%
fes-marketing.net	<10%	10%	3%	2%	64%
fiverr / shopify / google.com	<10%	7–10%	15–19%	11–14%	63%

Rabat — your impression share 65%, absolute top 49%

Competitor	Impr. share	Overlap	Above you	Abs. top	You outrank
fes-marketing.net	12%	17%	16%	6%	63%
flexiapps.net	<10%	7%	**91%**	**84%**	60%
majormedia.marketing	<10%	6%	56%	57%	63%
creaweb.ma	<10%	10%	49%	30%	61%
dotma.ma	<10%	11%	53%	33%	61%
hostinger / strikingly / shopify	<10%	7–11%	8–20%	4–10%	63–64%

Note: fes-marketing.net is now advertising in Rabat (your CLAUDE.md lists it as Fès-only).

google-ads-casa — your impression share 32%, absolute top 16%

Competitor	Impr. share	Overlap	Above you	Abs. top	You outrank
google.com	**27%**	**34%**	**99%**	**99%**	21%
reddit.com	13%	14%	67%	16%	29%
digitalisq.com	12%	18%	81%	35%	28%
technopek.com	<10%	12%	85%	26%	29%
mediazain.com	<10%	9%	79%	17%	30%
adverweb.ma	<10%	13%	13%	3%	32%

Overlap = how often their ad showed in the same auction as yours. **Above you** = when both showed, how often they ranked higher. **Abs. top** = how often they were the first result. Missing: July data to explain the August CPC jump in Casablanca.

4. Action plan

Do the steps in this order. Steps 1–8 take about 3 hours in total.

#	When	Action	Issue	Effort
1	Today	Compare October real leads (sheet) with the 66 reported conversions	1	10 min
2	Today	Restore form + qualified-lead (OCI) conversions as primary; WhatsApp → secondary or lower value	1	30 min
3	Today	Create and attach the 2 shared negative lists; add google-ads-casa negatives	4, 9	20 min
4	Today	Remove the 13 negatives that block buyers	5	15 min
5	Today	Location option → “Presence” on all campaigns; turn off auto-apply	7, 10	10 min
6	This week	Rewrite Casablanca and Rabat ads (freelance, price, delivery, no “nous/agence”)	6	30 min
7	This week	“creation site internet” → exact; add converting exact keywords; split e-commerce ad group	2	20 min
8	This week	Ad schedule on google-ads-casa; fix /rabat#ecommerce sitelink; /tarifs mobile CTA	9, 11	30 min
9	This week	Reactivate Marrakech (~100 MAD/day) on /marrakech	12	15 min
10	+2 weeks	Desktop at -40%; review Casablanca target CPA (~110) with clean data	3, 8	10 min
11	Weekly	Search-terms review → new negatives / new exact keywords; OCI upload	2, 4	20 min
12	+4 weeks	Re-run this audit; compare Quality Score with this baseline	—	—

What to measure after the changes

Metric	Today	Target in 4–6 weeks
Cost per real lead (form + qualified WhatsApp)	unknown — not tracked	measured weekly
Casablanca cost per conversion	99 MAD	≤ 70 MAD
Quality Score “creation site internet”	5	≥ 7
Share of spend on exact matches	8%	≥ 40%
Spend on DIY / builder searches	~1 600 MAD / 30 days	< 300 MAD
Cities running	Casablanca, Rabat	+ Marrakech

Appendix A — Negative keyword lists (paste-ready)

Google Ads → Tools → Shared library → **Exclusion lists** → + → paste. Syntax sets the match type: "phrase", [exact], broad.

List 1 — MDP — Universel (all 4 campaigns)

```
"offre d'emploi"        "emploi"              "recrutement"          "stage"
"salaire"               "job"                 "jobs"                 "formation"
"cours"                 "tutorial"            "tutoriel"             "tuto"
"apprendre"             "certification"       "examen"               "pdf"
"download"              "télécharger"         "gratuit"              "gratuitement"
"free"                  "fiverr"              "upwork"               "login"
"connexion"
```

“free” in phrase match does not block “freelance”. Also add the Arabic word for “free” as a phrase negative (copy it from ads/shared-negative-lists-2026-10-29.md).

List 2 — MDP — Site web DIY (Casablanca, Rabat, Marrakech)

Builders and platforms (phrase)

```
"website builder"       "site builder"        "web builder"          "page builder"
"generator"             "generateur"          "générateur"           "maker"
"editor"                "wix"                 "squarespace"          "square space"
"shopify"               "hostinger"           "hostingersite"        "strikingly"
"godaddy"               "webflow"             "webador"              "webnode"
"zyro"                  "site123"             "site 123"             "123site"
"website123"            "carrd"               "mixo"                 "webild"
"tiiny"                 "tini site"           "brizy"                "blogspot"
"blogger"               "teleporthq"          "devaito"              "durable"
"mobirise"              "odoo"                "flazio"               "peach web"
"peachweb"              "ecomnation"          "gomage"               "vytrini"
"codunk"                "pagepilot"           "netlify"              "vercel"
"github"                "google site"         "google sites"         "sites google"
"e monsite"             "elementor"           "avada"                "bubble io"
"10web"                 "tilda"               "framer"               "lovable"
"canva"                 "claude"              "infomaniak"           "magento"
"prestashop"            "opencart"            "big cartel"           "ecwid"
"youcan"                "yocan"
```

Do-it-yourself intent (phrase)

```
"how to"                "faire soi-même"      "soi-même"             "moi-même"
"i wanna"               "build your store"    "build website"        "create website"
"create a website"      "create your website" "make a website"       "template"
"templates"             "thème"               "plugin"               "modèle de site"
"exemple"               "html"                "prompt"               "ai"
"ia"                    "figma"               "maquette"             "blog"
"logo seul"             "réseaux sociaux"     "facebook"             "portfolio"
"landing page generator" "landing page free"  "landing page gratuite" "squeeze page"
"website management"    "website tools"       "web creators"         "https"
"www"
```

Exact only

```
[web design]            [website design]      [web development]      [website]
[site internet]         [landing page]        [code website]         [code site web]
[web space]             [page z]              [site business]        [mon site web]
[site site]             [son site]
```

[site web] is deliberately not blocked: 344 MAD for 5 conversions (69 MAD each, below average).

Competitor and agency names (exact)

```
[booming btl casablanca]        [boxcom casablanca]          [conversium casablanca]
[elavi agency casablanca]       [eskimoz casablanca]         [tribal ddb casablanca]

List 3 — google-ads-casa (campaign-level)

[google ads]	[ads google]	[google ad]	[google adwords]
"google ads login"	"se connecter"	"compte google ads"	"compte suspendu"
"adsense"	"admob"	"keyword planner"	"skillshop"
"youtube"	"c'est quoi"	"comment faire"	"community manager"

Not included on purpose: “comment” (some “comment créer un site” searches became quote requests — decide once real-lead tracking is back) and “storeino” (converted in June).

Appendix B — Data and method

- Source: Google Ads API (read-only GAQL queries) for account 528-046-9672, currency MAD, timezone Africa/Casablanca.
- Main window: 29 Sep – 28 Oct 2026 (30 days); comparison window 30 Aug – 28 Sep; monthly trend May – Oct 2026.
- Data pulled: campaigns, settings, keywords + Quality Score, 654 search terms, ads, 340 negatives, devices, locations, hours, landing pages, conversion actions, 202 change-history events.
- Auction insights: manual exports per campaign for the same window (not available through the API).
- Conversions are “Contact-from-moudev” only (WhatsApp/phone clicks) — every cost-per-conversion figure in this report inherits the limitation described in issue 1.
- No change was made to the account.
