Google Ads Campaign Plan

Improvements for each running campaign, ready for Google Ads Editor

Account 528-046-9672 · Data 30 Sep – 29 Oct 2026 · Prepared 30 Oct 2026 · Follows the 29 Oct audit

Summary

5 104	421	69	74 MAD	0%
Spend (MAD)	Clicks	Conversions	Cost / conversion	Lost to budget

No campaign is limited by budget. Every gain comes from **relevance**: the keyword, the ad and the landing page must say the same thing. This plan rewrites the ads, cleans the keywords and assets, and fixes the settings of the 3 running campaigns. Everything is packaged as CSV files for **Google Ads Editor** (folder `ads/editor-import-2026-10-30/`).

Status 30 Oct: everything in this plan was **applied through the Google Ads API** (dry run first, each step approved). **Do not import the Editor files** — they would create duplicates. Remaining: pause the 3 old ads once Google approves the new ones; bid changes at +1 and +2 weeks.

Campaign	CPA today	Main problems	Target (4–6 weeks)
Creation-site-web (Casablanca)	94 MAD	Sitelinks send visitors to /rabat · homepage landing (CPA 151) · half the spend on one keyword · “Agence” in the ad	≤ 70 MAD
creation-site-web-rabat	46 MAD	No callouts · broken sitelinks · “Contactez-nous / agence” · QS 3 on Rabat keywords · Salé/Témara not targeted	30+ conv/month at ≤ 55 MAD
google-ads-casa	33 MAD	Paused by hand every day · DIY keyword with 0 conv · incomplete ad (10/15 headlines)	10+ conv/month at ≤ 40 MAD

Where each campaign stands

Campaign	Spend	Clicks	Conv.	CPA	Impr. share	Lost (rank)	Bidding	Budget/day
Casablanca	3 941	288	42	94	64%	36%	Max conv., tCPA 100	400
Rabat	965	98	21	**46**	65%	35%	Max conv., tCPA 60	200
google-ads-casa	198	35	6	**33**	32%	68%	Max clicks, cap 6	60

Amounts in MAD, 30 Sep – 29 Oct 2026. Desktop and tablet are at −100% on both website campaigns.

Step 0 — before anything else (account-wide)

The only conversion action is still **Contact-from-moudev** (WhatsApp/phone clicks). Google optimises every bid for a click on a WhatsApp button, not for a real quote request. The changes in this plan help without it, but you can't measure them properly until real leads are counted.

1. Tools → Conversions: restore **Submit lead form** and **Lead Qualifié (OCI)** as primary actions.
2. Recommendations → Auto-apply: turn off every type.
3. Account settings → Automatically created assets: off. Otherwise Google rewrites the new ads on its own.

1 · Creation-site-web (Casablanca)

3 941 MAD · 42 conv · CPA 94 → target ≤ 70

What's wrong

- **4 of the 5 sitelinks send Casablanca searchers to the Rabat page** (/rabat, /rabat#seo, /rabat#contact, /rabat#ecommerce): 17 clicks, 190 MAD this month. #seo didn't exist on /rabat, so visitors landed at the top of the wrong city's page.
- **Keywords landing on the homepage convert worse**: homepage CPA 151 vs /casablanca CPA 88.
- **“creation site internet”** (phrase) = 1 992 MAD, half the spend, Quality Score 5, expected CTR below average.
- The ad says “Agence Web à Casablanca” and “Au Meilleur Tarif”, with no price and no delivery time.
- Every callout is attached twice; one ad group mixes vitrine, e-commerce, prices and English keywords.

Structure — 2 ad groups

Ad group	Keywords	Landing page
creation-site-web-casablanca (existing)	Everything except e-commerce	/casablanca
E-commerce Casablanca (new)	"creation site e-commerce", [creation site e-commerce maroc], "creation site e-commerce casablanca", "site e-commerce casablanca", "boutique en ligne casablanca", [creation boutique en ligne]	/ecommerce

Keywords

Action	Keywords
Pause	The 3 e-commerce keywords moved to the new ad group
Add (exact)	[creation site internet], [création site internet], [creation site web casablanca], [création site web casablanca], [développeur web casablanca], [developpeur web casablanca], [site web casablanca], [creation site internet casablanca], [agence site web casablanca]
Landing page → /casablanca	creation site web maroc, création site web maroc, entreprise de conception de site web, developer site web maroc, creation site internet moins cher, web developer casablanca, website design morocco, web developer morocco, site web PME Maroc, website design casablanca
Keep on /tarifs	prix / devis keywords: /tarifs now has a WhatsApp button at the top (after the upload)
Keep (judgment call)	"creation site internet" phrase stays for 2 weeks next to the exact versions; [créer un site web] stays (3 conv for 71 MAD)

2 · creation-site-web-rabat

965 MAD · 21 conv · CPA 46 — best campaign

> Rabat has held a cost per conversion of 44–49 MAD for 6 months. The goal is **more volume at the same cost**, not a cheaper click.

What's wrong

- **No callouts at all.**
- Sitelinks: “creations site web” (lowercase, same page as the ad), “Landing Page Rapide”, “Expert SEO Maroc” (→ /rabat#seo, doesn't exist), “Création Site E-commerce” (→ /rabat#ecommerce).
- Ad copy says “Contactez-nous”, “Appelez-nous”, “agence de création de site web”, “Au Meilleur Tarif”, and one description is only {Keyword}.
- **Low Quality Score on Rabat keywords**: [agence web rabat] QS 3, [création site web maroc] QS 3, [création site web rabat] QS 5 with expected CTR below average.
- Location = Rabat city only; Salé and Témara (covered on the /rabat page) are not targeted.
- 35% of impressions lost on rank, 0% on budget — the 60 MAD target CPA is holding it back.

Keep	"creation site internet" — 633 MAD, 15 conv, CPA 42: it works here
Watch	"agence creation de site" (30 MAD, 0 conv), "agence creation site ecommerce" (25 MAD, 0 conv)

3 · google-ads-casa

198 MAD · 6 conv · CPA 33 — cheapest, smallest

What's wrong

- **No ad schedule**: the campaign is paused and resumed by hand from the phone every day, which resets its learning.
- Max CPC cap 6 MAD + 68% lost on rank. Part of it is google.com on navigational “google ads” searches (blocked by the negatives); the rest is the cap.
- **"campagne google ads"** = 72 MAD, 13 clicks, 0 conv: its searches are “annonce google”, “google ads library”, “comment publier…” — people doing it themselves.
- "agence google ads" has Quality Score 1. **"marketing digital casablanca"** brings 5 of the 6 conversions, but its landing-page score is below average.
- The ad uses 10 of 15 headlines and 3 of 4 descriptions; one description is “Gestion Google Ads À Casablanca -- Consultant Freelance”.

The **Marketing digital Casablanca** ad group gets the same ad with “Marketing Digital Casablanca” pinned to position 1 (display path marketing / casablanca).

Assets and settings

Sitelinks are good (all point to /google-ads sections). **Callouts to add**: Audit Gratuit · Rapport Mensuel · Suivi des Conversions.

Setting	Today	Change to	When
Ad schedule	None + manual pausing	**07:00–24:00 every day**, stop pausing by hand	Now

Site fixes — done

Page	Change	Why
/casablanca, /rabat, /	Each service card has its own anchor: #vitrine, #ecommerce, #sur-mesure	#ecommerce was missing; Ads sitelinks point to it
/tarifs	WhatsApp button “Devis gratuit — réponse en 24h” + phone at the top (GA4 cta_source = tarifs-hero)	Price keywords land here; 11 clicks, 0 conv, no button before the price cards
/google-ads	Intro now says “marketing digital à Casablanca” in its first sentence	Landing-page score of the keyword with 5 of 6 conversions

These changes are built in `dist/` but **not live until you upload it** — with hidden files shown, so `.htaccess` goes up too. Upload before posting in Editor.

Applying it with Google Ads Editor

File (ads/editor-import-2026-10-30/)	Rows	What it does
01-ad-groups-and-keywords.csv	61	2 new ad groups, 31 new keywords, 10 landing pages moved to /casablanca, 18 keywords paused
02-responsive-search-ads.csv	5	The 5 new ads above, with pins
03-negative-keywords.csv	552	Negatives from the 29 Oct lists + 30 Oct additions (Casablanca 241, Rabat 241, google-ads-casa 70)
04-sitelinks.csv	10	5 for Casablanca, 5 for Rabat
05-callouts.csv	15	6 Casablanca, 6 Rabat, 3 google-ads-casa
06-structured-snippets.csv	2	“Services” snippet for Casablanca and Rabat

Checked: every text is within Google's limits, and none of the new keywords is blocked by a new negative or by the 680 already in the account.

Steps

1. **Upload dist/** (site fixes) — with hidden files.
2. Editor → **Get recent changes** → account 528-046-9672.
3. **Account** → **Import** → **From file**, files 01 to 06 in order. For each: check the preview → Process → Keep proposed changes. Duplicate-negative warnings on file 03 are normal. If a column isn't recognised (e.g. Snippet Values), map it in the preview.
4. **By hand in Editor**: pause the 3 old ads · unlink the 5 old sitelinks on Casablanca and on Rabat · remove the 8 old Casablanca callouts · delete the negatives that block buyers (below) · Location option = Presence on all 3 · add Salé + Témara to Rabat · ad schedule 07:00–24:00 on google-ads-casa.
5. **Check changes** → fix any red error → **Post**.
6. Tell me it's posted: I check through the API that everything landed, and I review the search terms on **6 Nov 2026**.
